XC Toys

OEM PLUSH MANUFACTURING

CUSTOMER-OWNED DESIGN / MANAGED PRODUCTION

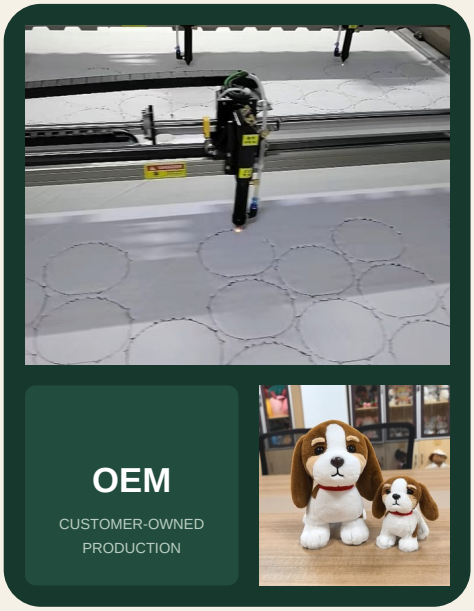

OEM CAPABILITY OVERVIEW

OEM PLUSH PRODUCTION

Your design. Built for production.

XC Toys coordinates OEM plush manufacturing for brands, gift companies and product teams working from customer-owned design files, technical packs, production patterns or approved physical samples.

We do not provide original character design.
Our role is to turn your approved specification into production.

Manufacturing and product reference imagery

OEM production scope

- Sample and production-pattern coordination
- Fabric, trim and component sourcing
- Cutting, sewing, filling and assembly
- Finishing, quality checks and packing
- FOB Shenzhen dispatch coordination

What we need to review

- Design ownership or written authorization
- Technical pack, pattern, sample or clear specification
- Target quantity, market and delivery date
- Packaging, labels and compliance requirements

How an OEM project moves

01 Review
Files, rights, route and quote

02 Sample
Approve the production reference

03 Produce
Materials, sewing and checkpoints

04 Deliver
Finish, pack and FOB dispatch

Quality and compliance

The approved sample becomes the production reference. Checkpoints can cover materials and trims, dimensions, appearance, construction, needle or metal detection and packing. Testing, labels and market requirements are reviewed against the product and destination.

Our operating model

XC Toys is the customer-facing OEM partner. Production is carried out by an independent manufacturing partner. XC Toys coordinates specifications, quality checkpoints and delivery.

Specifications, MOQ, pricing, testing and lead times are confirmed after reviewing the project files. Production images are reference material and do not represent a public product catalogue.

Start with an OEM production review.
